DETAILED ACTION

Priority

This is a 371 application of PCT /FR99/0190.

Information Disclosure Statement

The IDS filed on Jan 02 and April 02 has been made of record. Duplicate listings of cited patents have been crossed out.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 10 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5796710. Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between the claims is an obvious variant. That is, the examiner interprets the information medium of the patent claim differing in terminology with respect to the recitation in the present claim of the phrase "groups of tracks". As written, to designate a plurality of tracks as a group is merely an obvious variant over a single track.

Allowable Subject Matter

3. Claims 1-9 are allowed. None of the cited and discussed prior art provides for a processing circuit to yielding/performing the recited multiplication of the sampled value.

Art Unit: 2653

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Denissen et al is cited as illustrative of another dsv system in this environment.
